

Philipp Richard

**Team Lead, Energy Systems and Digitalisation,
dena (German Energy Agency GmbH)**

Philipp Richard graduated with a degree in industrial engineering from TU Berlin. He has been working at the German Energy Agency GmbH (dena) since 2011 and has gained extensive management experience over the past seven years.

Prior to his time at dena, Mr Richard worked in the field of profitability calculation of medium and large power plants for the heat and power sector.

In his role at dena, Mr Richard is responsible for various projects in the areas of smart metering, smart grid, blockchain, artificial intelligence and market and system integration of renewable energies.

Currently, Mr Richard is in charge of the following projects; “Blockchain in the Integrated Energy Transition” (since 2018), “Analyses and Dialogue Processes in Support of Digitization in Energy, Energy Efficiency and Renewable Energy” (2016-2018) and a Working Group on the “Dynamics of Digitization in the Digital Energy World Platform” (2016).

2 October 2018, Berlin
