

Sebnem Rusitschka

Founding Researcher, Freeelio, and Founding Member, German Blockchain Association

Sebnem Rusitschka is a computer scientist who worked in applied research at Siemens since 2006, in the areas of P2P and cloud computing, machine learning and smart embedded systems, with applications in energy automation and decentralized energy systems.

In 2016, she started Freeelio as a founding researcher to discover customers and business models for disruptive technologies AI and blockchain in the energy sector. Sebnem is helping entrepreneurs to reap the benefits of new technology to enhance their offering. One such venture is <THE SUN PROTOCOL>, an innovative financial and business model for rural electrification in Sub-Saharan Africa. She also heads the Energy Committee of the German Blockchain Association.

2 October 2018, Berlin
